# Inventive Ideas for Terrific Task Cards

## Whole Class

- Project a multiple-choice task card for all students to see. Set a designated time for students to answer using whiteboards, hand signals, or A, B, C, D index cards. Answers held up for teacher viewing make a quick and easy formative assessment tool.
- Project an open-ended task card every morning for students to begin working on as soon as they are seated at their desks.
- Project a certain number of task cards for students to answer on a piece of paper to turn in for a daily grade or test grade.
- Mix up task cards on various topics and use as test prep review and practice.
- Copy one page of a task card set as needed for effective (but not overwhelming) homework.
- Put task cards in your substitute teacher plans for a no-prep activity and valuable practice.
- Play Scoot by placing numbered task cards around the room on desks or on the walls. Have students make a numbered answer sheet. Students move from one card to another and record their answers during a set amount of time. When time is up, the teacher tells the students to “scoot” to the next sequentially numbered card.
- Divide the class into teams and play a game such as Jeopardy, Millionaire, or Wheel of Fortune (editable PPT templates can be found online).
- Send students on a Task Card Treasure Hunt by hiding the task cards around the room and sending students around with clipboards and answer sheets.

## Small Groups

- Keep task cards in centers for rotations.
- Use task cards as game cards in intervention groups with game board printables or any generic game board such as Candyland or Chutes and Ladders. A correct answer means a student can take a turn on the board game.
- Play Trashketball by having each student draw a task card and answer it. Give one point for a correct answer. Allow students the option of throwing a wadded up piece of paper into the trashcan for a bonus point.

## Student Partners

- Pairs work together to answer questions or solve problems on task cards.
- Pair each of your students with an upper grade student from another class and use task cards during a scheduled Study Buddy time.
- Play Turn and Learn by having student partners sit or stand back-to-back with whiteboards or clipboards. Give the pair the same task card to work on, then have them face with other, compare answers, and discuss.

## Individual Students

- Pull task cards as needed for tutors or parent volunteers to work on with students who need extra help.
- Keep some creative or more challenging task cards in a basket available for early finishers as an enrichment activity.
