Professional Presentation (Level 3)
Bottling Up Plastic Pollution

FCCLA Planning Process Summary Page Template

IDENTIFY CONCERNS

Before this project begins, we are eager to include many statistics and details to set up a solid argument with little irrefutable evidence. Our pacing and visual display will be key in keeping the audience interested as well as producing enough evidence for an informative and influential presentation.

SET A GOAL

Our goal is to inform the audience enough to take part in and take responsibility in the rehabilitation of our planet. We plan to use facts and evidence of the issue to bluntly spread awareness of this issue.

FORM A PLAN (WHO, WHAT, WHEN, WHERE, HOW, COST, RESOURCES, AND EVALUATION)

Who: Both project members will present to a group of FCCLA members, family members, and a Nutrition and Food Science class. The presentation will be aimed at the younger generation and FCCLA chapters to inspire and motivate a change in the world beginning at a local level.

What: We will spread awareness, motivation, and information on how to improve recycling through our campaigning materials and presentations.

When: In the two weeks before our competition presentation, we will set up posters in hallways and schedule and present our displays to the three different groups for critiques and awareness.

Where: Our class and FCCLA chapter presentations will take place in Northside High School in Columbus, GA as well as posters and the third presentation will be in our home to family.

How: We plan to use statistics, charts, and pictures to emphasize our planet's problems and apply them to a tri board presentation to match our oral presentation.

Cost: Our sources will come from government promoted articles and scientific experiments from online sources. The shirts we pass out to promote awareness are donated from a t-shirt printing company and are identified as a sponsorship for our FCCLA chapter.

Evaluation: We are concerned our project and posters will be ignored and stereotyped as "just another pollution project". There are many people who do not believe change is possible with just their help, therefore ignoring our campaign. However, we still have hope that this project will motivate and push our generation into taking mindful steps to improve our ocean pollution one small act at a time.

ACT

After researching ocean gyres and the defects and issues that plastic cause to oceans and its habitats, we will present our information and displays to three different audiences including our family, our FCCLA chapter, and students partaking in Nutrition and Food Science pathway classes. We will also promote awareness through shirts, posters, and brochures.

FOLLOW UP

Our presentations were successful in informing the audiences in the scale and urgency of what needs to change in each level of the world including the local and personal environments. When we redo this project, we wish to include a way of measuring our presentation's effectiveness. We could possibly include a pre-test to measure the knowledge before and after our presentation and display.

EVIDENCE OF PROJECT SUMMARY SUBMISSION

Thank you for completing the project summary form for your STAR Event. To receive the point for submission, print this email and have your adviser verify by signing and dating below for including in a display, file folder, or portfolio. One survey per entry is required.

Chapter Name: Northside High School-Columbus - 10978

State: Georgia

Members: Chris Chai, Ms. Savannah Chai

Event Name: Professional Presentation

Level: Level 3 (grades 11 and 12)

Project Title: Bottling Up Plastic Pollution

Adviser's Signature Karla Buckholz

Date 2/18/2020

Christopher Chai and Savannah Chai

Mrs. Buckholz

FCCLA STAR Events

2-21-20

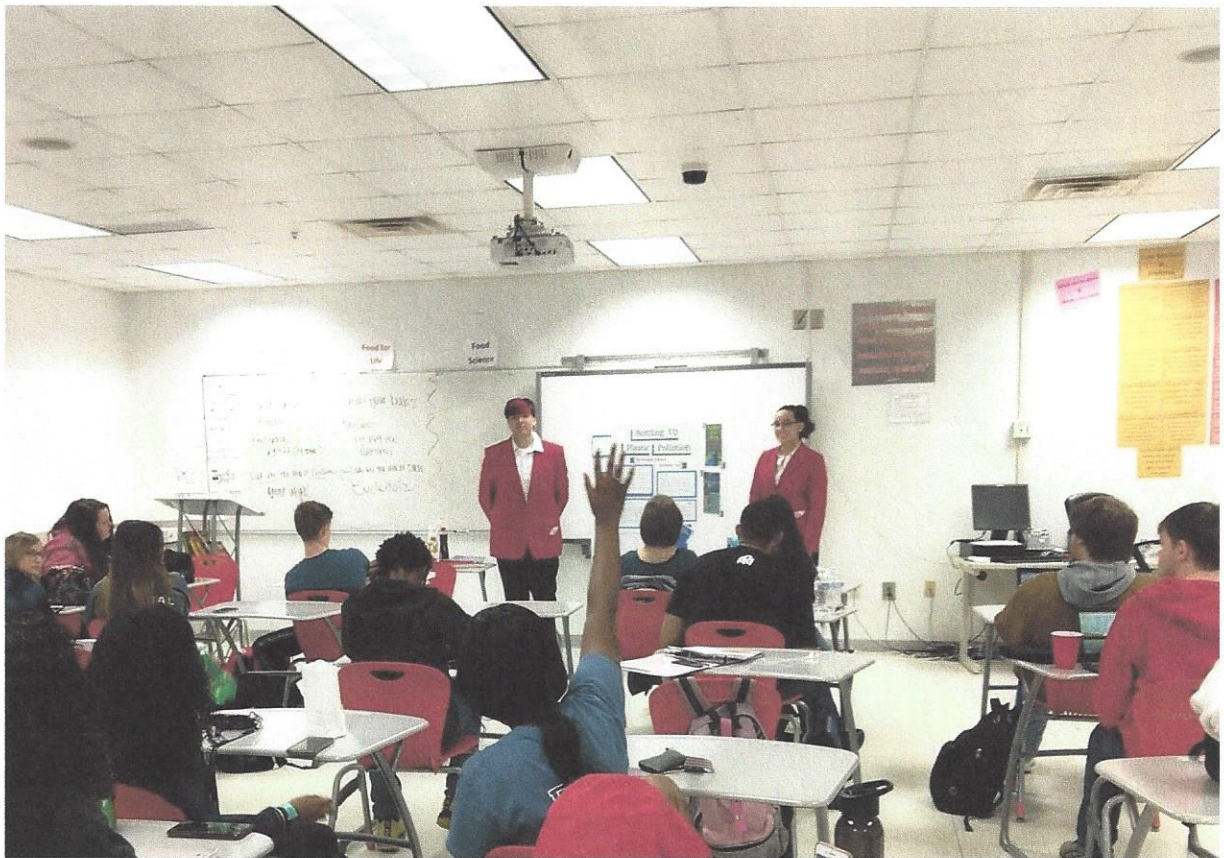

Documentation of Delivery

Presentation 1: 2nd Period Food for Life class

Date: Friday, February 21 2020

Location: 2002 American Way #1749, GA 31909

Proof:

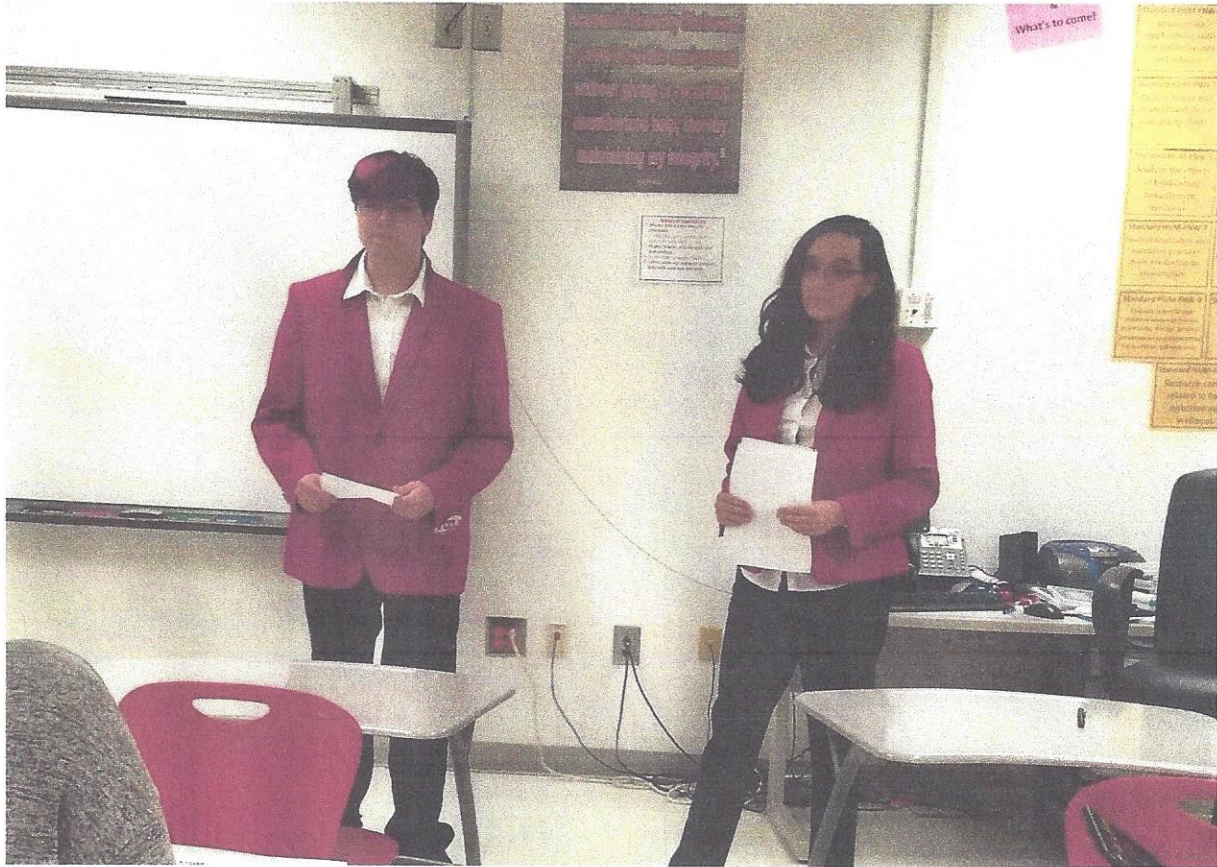

Presentation 2: Advisor and fellow competitors

Date: Friday, February 20 2020

Location: 2002 American Way #1749, GA 31909

Proof:

Presentation 3: Family and Friend (Total of 3)

Date: Friday, February 21 2020

Location:

Proof:

Christopher and Savannah Chai

Mrs. Buckholz
